

School Tuition and Revision program for Year 12s.

JCU STAR

Maths Methods exam prep for Year 12s

Join JCU STAR for dedicated support to brush up on the year, learn ahead of term and be ready for your exams.

JCU STAR will open with study support for Mathematical Methods, which is essential for studying many popular courses at university including science, business and finance, engineering and IT.

Interactive learning sessions will be run by experienced teachers, who will help you revise the full year's course content, upgrade your study skills and prepare you for external exams.

► Brush up on the year

- Review all the Mathematical Methods course content you covered so far this year
- Build a stronger knowledge base going into next term and your final exams
- Receive a workbook with unique exercises to help guide your revision program.

► Learn ahead of term

- Get a head start on next term with help to understand what's coming up
- Preview the ATAR course content in the next school term
- Become familiar with the concepts and get more out of your classes.

► Be ready for your exams

- Work through practice exam questions
- Get help to identify where you can improve
- Pick up tips and tricks for using your exam time wisely.
